

GenMedPro™

## Precision Medicine Software

### A clinical decision support tool

Genomind's PGx test and GenMedPro™ were designed to work in partnership to help you evaluate safer prescribing options more effectively and quickly.

Medications are analyzed against key genes that can impact a patient's metabolism, absorption, and sensitivity.

### Covers 99% of the most commonly prescribed medications

- Psychiatric
- Pain management
- Neurology
- Cardiovascular
- Gastroenterology

**24-33%**  
of post-discharge  
adverse drug events were  
deemed preventable.<sup>1</sup>

# Optimize your patient's PGx report with GenMedPro™

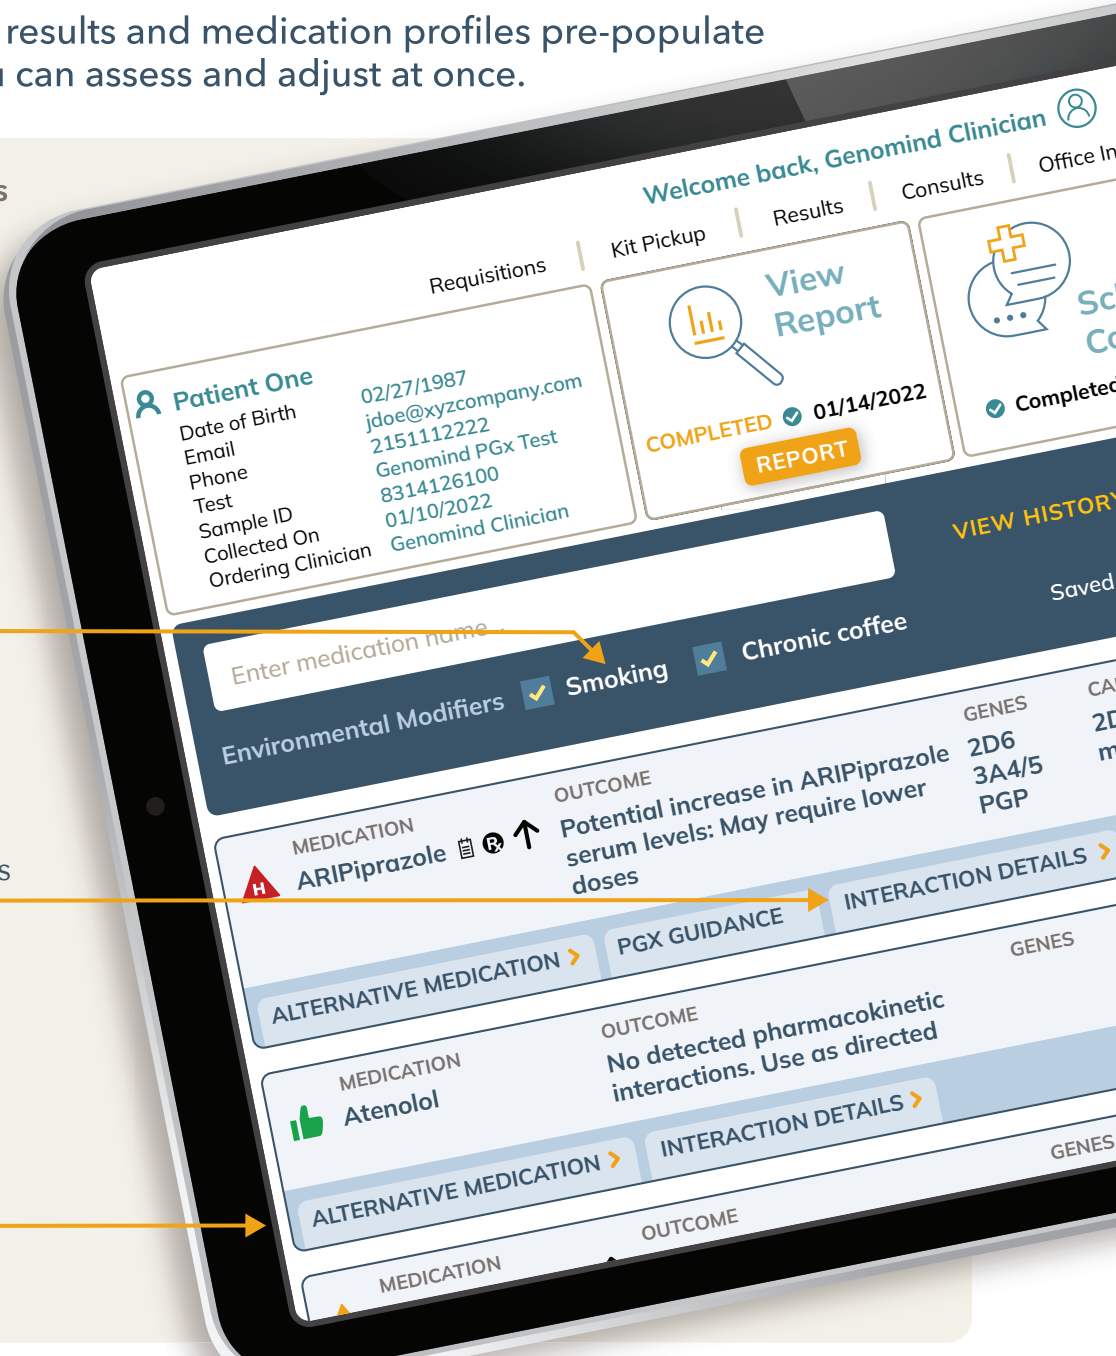

Your patients' genetic results and medication profiles pre-populate in the software, so you can assess and adjust at once.

Evaluate your patient's genetic profile against their current medication regimen

Input environmental factors

Identify potential drug-drug and gene-drug interactions

Assess safety of alternative medications easily

**Complimentary access:**  
to GenMedPro™ as a Genomind-  
ordering healthcare provider.
